

## New Home Construction Pioneer Project

This home is a 1200 square foot house with two bedrooms and two baths. It features forty-year architectural shingles on the roof. It also has heavier felt paper and 5/8" plywood on the roof. The windows are a double insulated, argon filled energy efficient design.

The average electric bill for this house is \$85 per month.

This house was built as a low income house, financed by the USDA.
