September 2007

STEWART CONSTRUCTION BUILDS GREEN WITH FOX BLOCK

Stewart Construction has partnered with the Fox Block insulated core foam (ICF) block. A standard 2 x 4 wood frame wall will have an approximate R-11 value. A standard Fox Block ICF wall system will have an R-24 value. In addition to the energy savings from higher R-values, the ICF block system is quiet, stable in high moisture environments, resistant to mold & mildew and extremely stable in high wind situations.

Stewart Construction is a Florida licensed certified building contractor and Florida certified roofing contractor. Stewart Construction is home-based in Sebring. They have been doing business in Highlands and surrounding counties since 1990.

To contact them, call Mark Stewart at 863-385-9403 or by e-mail at mark@strato.net Visit the web site at www.StewartConstruct.com
