

# Crowe House Remodel

## Whole House Remodel with Floor Plan Modification

This house needed an entire remodel, including new kitchen, new bath and floor plan modifications. The floor plan was also flawed with the entrance door on the back of the house entering into the dining / kitchen. The bedrooms were on the front of the house and the bath & laundry area needed help. We created an open floor plan with the living room, kitchen and dining room at the front of the house and moved the front door to the front of the house opening into the new living room. We turned the family room and living room into a master bedroom with the bath opening into the master and also the main public area, small second bedroom, computer nook and new walk-in closet.

The house has new interior drywall, new ceramic tile, bath fixtures, kitchen cabinets & appliances, new light fixtures throughout and a new HVAC system.
